

**TECHNICAL DATA SHEET**

G-Effect / G-Force / G-Effect-T

Product	Finished Foil G-Series
Component	Coated Paper
Width	Max. 1,900mm (*MAX. 2,120mm available in G-Effect / G-Force per request.)
Laminates	Lamination (roll/continuous) and profile wrapping treatments are feasible on substrates such as plywood, MDF, particle board and so forth.
Surface textures	Standard coating, Synchronized gloss/matt effect, Synchronized gloss/matte
Gloss Level	Depending on the surface texture, available in gloss level gradations ranging from matt to gloss.
Weather resistance	No significant changes under ultraviolet fade meter for 20 hours. *Light resistance improvement available per request.
Resistance	In accordance with DIN 68861, Part 1C IOS-MAT-0066 2.1.A R4/R2 quality available. IOS-MAT-0066 2.1.K R2K quality available for G-Effect finish.
Formaldehyde	Formaldehyde free
FSC certification	FSC MIX credit materials is available per request.
